SYNCHRO ERP

Cast Metal Specific Software – Est. 1975

Integration with the majority of financials systems

Functionality			
Option	Option 1	Option 2	Option 3
Integration	Simple export/import interface which allows you total control over when information is moved in either direction	Simple export/import interface which allows you total control over when information is moved in either direction	Completely automated interface with controls in place so that transactions will only post once approved.
Integration Type	Manual	Manual	Automatic
Set up required	Crystal Report in background to do the export	Coded into the Synchro ERP main program and selected from the Yes/No options in the software	Coded as a seamless service running in the background
License Consumed	0	0	1
Cost to Implement	Done on site as a part of the implementation	TBD once the full specification has been reviewed and agreed on site Onsite charge for implementation may apply - TBA	TBD once the full specification has been reviewed and agreed on site
Charge	Free	Free	Request Quote

Protecting your business

Fully integrated financial systems can be used to restrict SYNCHRO from carrying out certain operations... providing tighter control over your production and sales.

Examples

- Credit Status
- Productions Stops
- Credit Exposure
